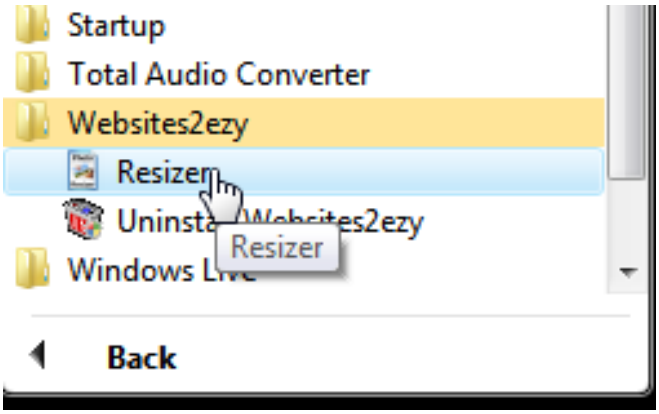
Launching the Program

1. There are two ways you can start **Bulk Photo Resizer**.
    a. You will notice the following icon appearing on your Desktop. You can double click the icon and launch the program.

    b. You can also, navigate through **Start -> All Programs -> Websites2ezy -> Resizer** as shown below.



2. Once launched, the following screen will be shown to you. This has Websites2ezy contact details as well as the Trial notification. This screen has four buttons as;

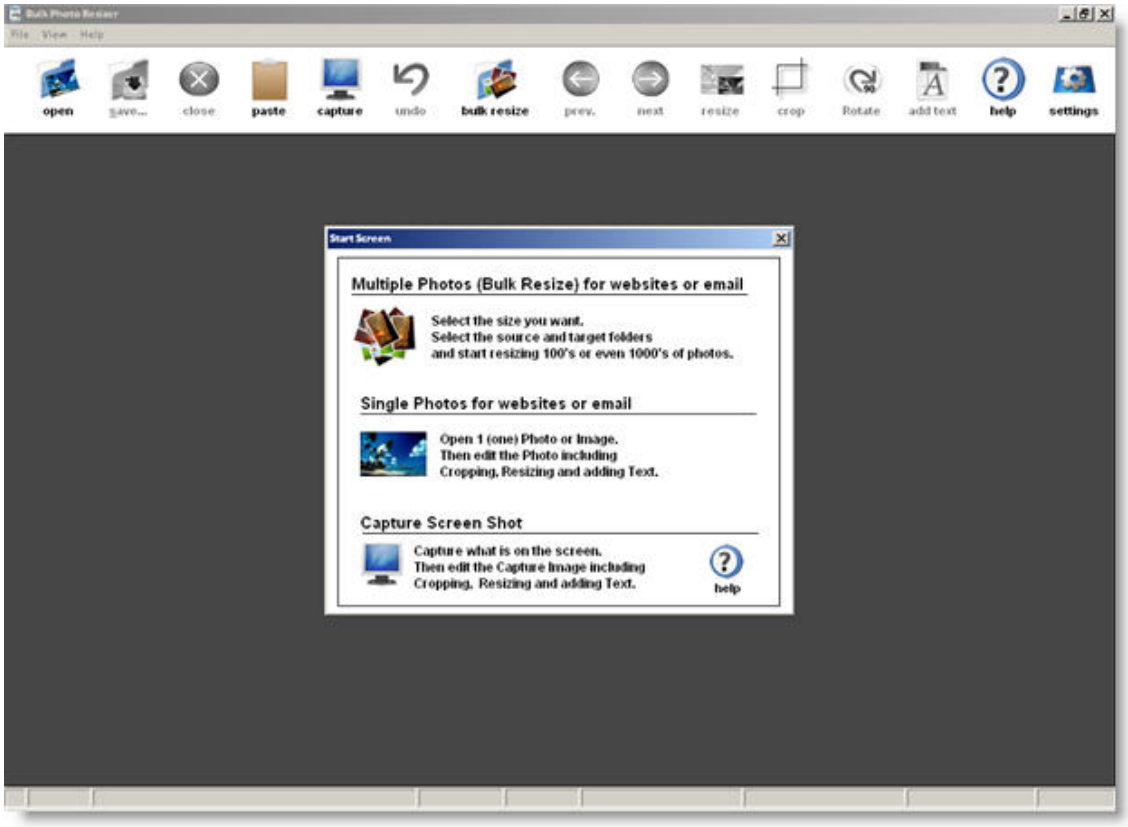
Starts “Bulk Photo Resizer” software.

Closes this window.

This will open a web browser and will take you to www.mybulkphotoresizer.com where you can make the purchase, if you are running on a trial version.

Once you purchase this software, you will be sent the Serial Number. You can click this button and enter the Serial Number you received from Aqua Websites.

3. Once you “Start” the program, you will be presented with the following screen.



After the Trial Period - Registration of the Software

After the initial trial period of 30 days, you will have to buy and register the product if you intend to use it any further. You can buy "Bulk Photo Resizer" by following below steps.

1. Launch "Bulk Photo Resizer" using the steps given above and you will be prompted with the following screen.

2. Click "Purchase" button and your default web browser will be opened where you will be taken to http://www.mybulkphotoresizer.com/.

3. Now you can make your purchase by clicking **"**Buy Now" button.

Using Bulk Photo Resizer

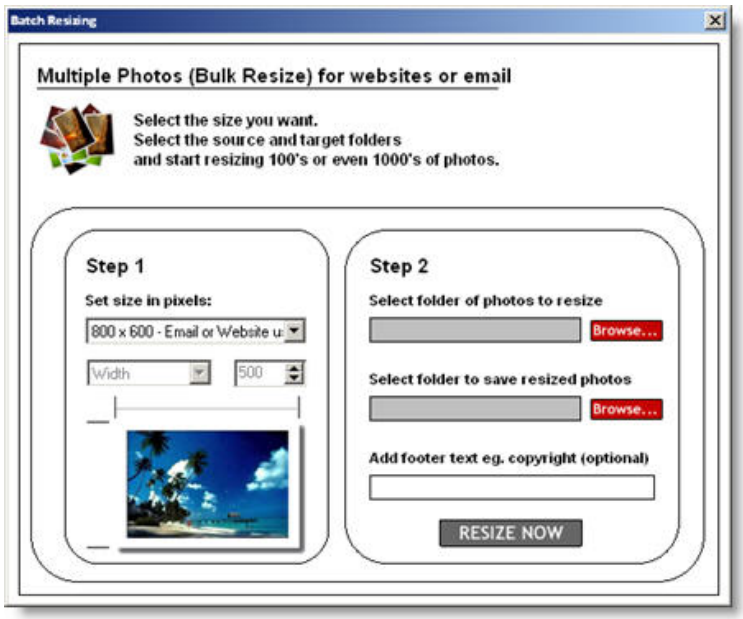
Bulk Resize Unlimited Photos

1. Launch the program and go to “Start Screen”. Click on “Multiple Photos (Bulk Resize) for websites or email” link.

Start Screen
Multiple Photos (Bulk Resize) for websites or email
Select the size you want.
Select the source and target folders
and start resizing 100's or even 1000's of photos.
Single Photos for websites or email
Open 1 (one) Photo or Image.
Then edit the Photo including
Cropping, Resizing and adding Text.
Capture Screen Shot
Capture what is on the screen.
Then edit the Capture Image including
Cropping, Resizing and adding Text.
help

2. Alternatively you can click on “bulk resize”

icon button in the icon panel of the main window and launch the below window.

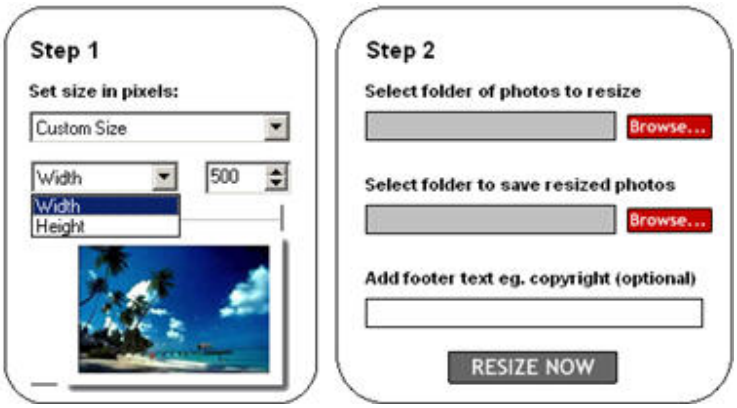


Batch Resizing
Multiple Photos (Bulk Resize) for websites or email
Select the size you want.
Select the source and target folders
and start resizing 100's or even 1000's of photos.
Step 1
Set size in pixels:
800 x 600 - Email or Website u
Width
500
Step 2
Select folder of photos to resize
Browse...
Select folder to save resized photos
Browse...
Add footer text eg. copyright (optional)
RESIZE NOW

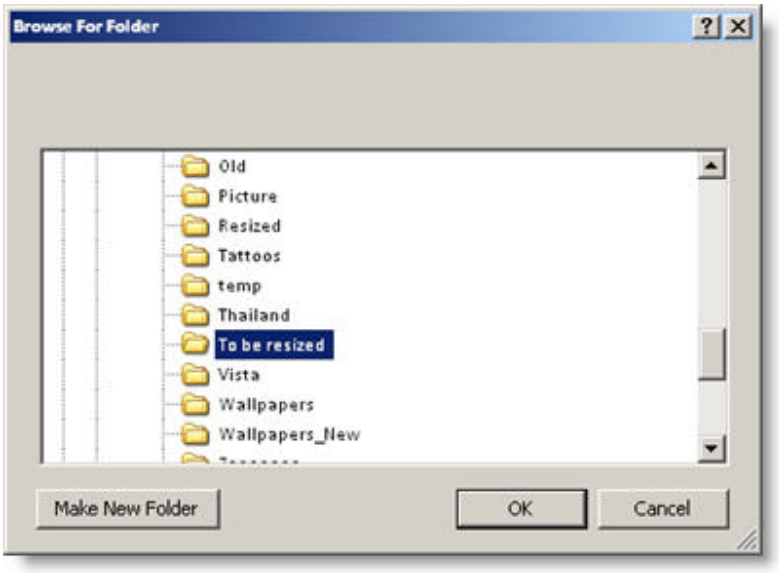
3. Under “Step 1”, select the picture size in pixels where you want your final photos to be. You have many output file sizes to choose from.

800 x 600 - Email or Website use
600 x 450 - Email or Website use
500 x 375 - Email or Website use
400 x 300 - Email or Website use
300 x 225 - Website use
200 x 150 - Website use
100 x 75 - Website use
Custom Size

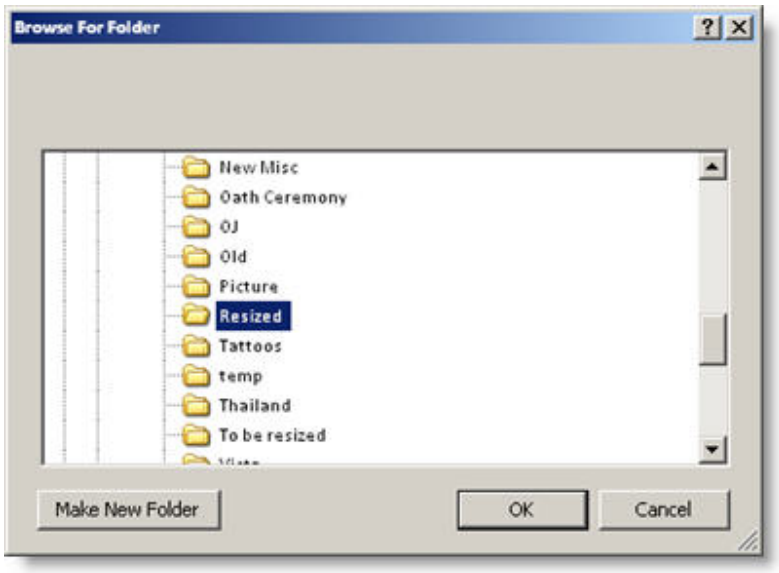
If “Custom Size” is selected, you can specify the Height and the Width of the output files manually as below:



4. Now under “Step 2”, browse and select the folder containing the photos to be resized.

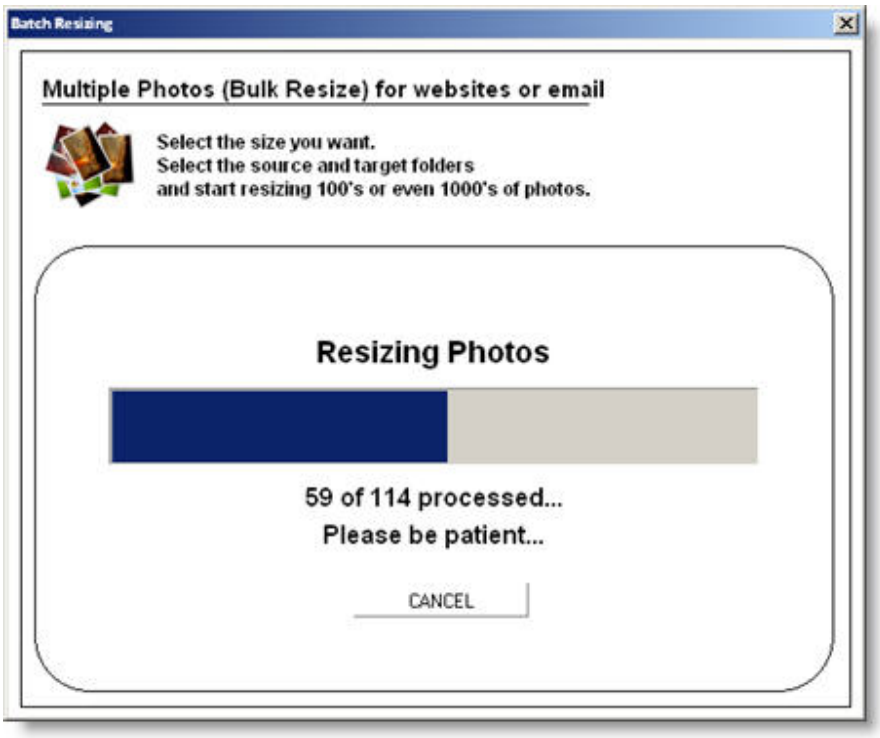


5. Again, browse and select the destination folder where resized photos should be stored.



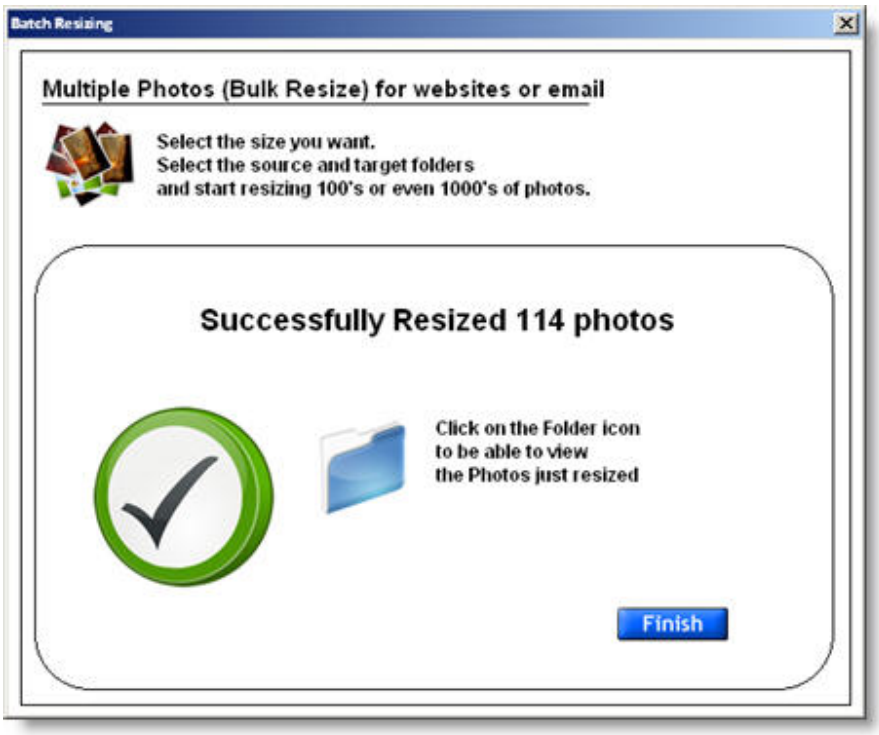
6. You can optionally add footer text to the images if you wish. This is performed for the images available on World Wide Web for copy right reasons.

7. Click “RESIZE NOW” to start resizing. Following screen will show the progress of the activity.



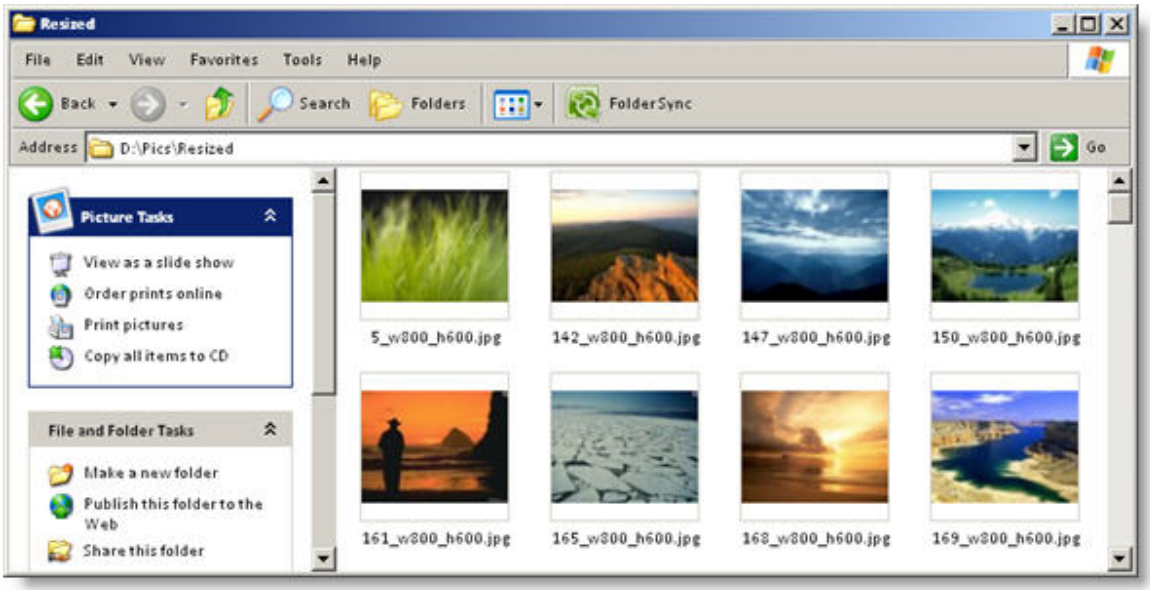
Batch Resizing
Multiple Photos (Bulk Resize) for websites or email
Select the size you want.
Select the source and target folders
and start resizing 100's or even 1000's of photos.
Resizing Photos
59 of 114 processed...
Please be patient...
CANCEL

8. Once the resizing is completed, you can click “Finish” button on the following window. Congratulations, you have now successfully resized a batch of photos!



Batch Resizing
Multiple Photos (Bulk Resize) for websites or email
Select the size you want.
Select the source and target folders
and start resizing 100's or even 1000's of photos.
Successfully Resized 114 photos
Click on the Folder icon
to be able to view
the Photos just resized
Finish

9. To view the photos that you just resized, you can click on the folder icon available in the above screen. Resized photos will be saved with a suffix to the file name and the original files will NOT be overwritten.



Single Photo Resize

1. Launch the program and go to “Start Screen”. Then click on “Single Photos for websites or email” link.

Start Screen
Multiple Photos (Bulk Resize) for websites or email
Select the size you want.
Select the source and target folders
and start resizing 100's or even 1000's of photos.
Single Photos for websites or email
Open 1 (one) Photo or Image.
Then edit the Photo including
Cropping, Resizing and adding Text.

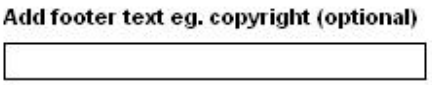
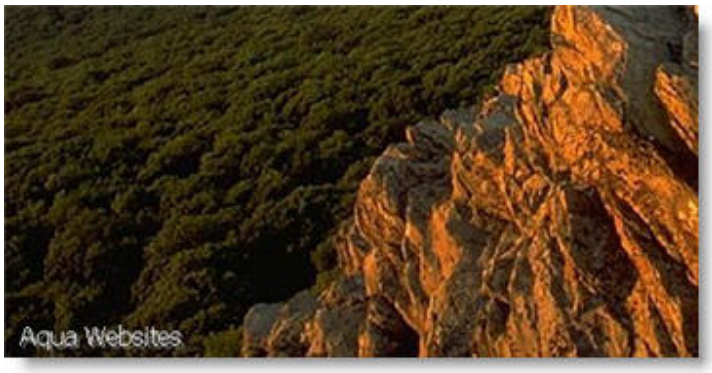
Image Manipulation Utilities

Adding Footer Text

While resizing photos, you can add footer text to your destination photos optionally. This is mostly used for copyright purpose. This feature is available for bulk resizing.



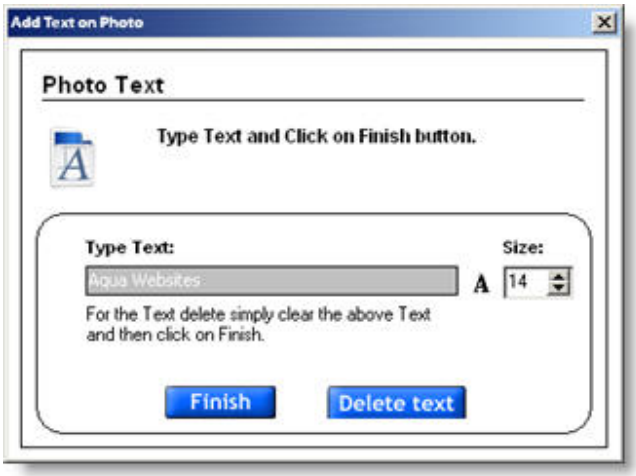


Example footer text

Adding Text to the Photo

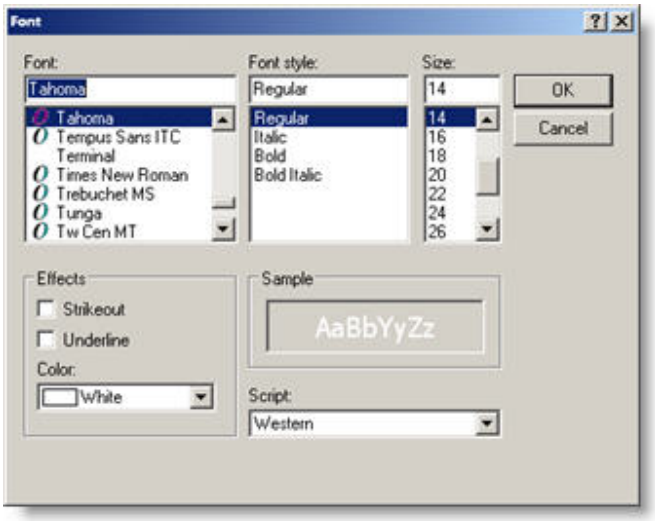
1. Open a photo in to the main window and click “add text” icon.

2. Write the text you want to add in the space given in the below window.



3. Click “Finish” to add floatable text to your photo. This text can be placed anywhere in your photo by dragging it.

4. You can change the type and the color of your font by clicking “A” icon of the above window.



5. By following the same procedures mentioned above, you can place as many texts as you want to your photo. These texts can be placed and arranged anywhere you wish by simply dragging them to the place where you want them to exist.

6. If you wish to edit the text that you have already added to the photo, you can simply double-click on the text and you will be prompted the same window as in step 2. You can do the changes and again click on the “Finish” button to make the changes take effect.

7. In case if you want to delete the text that you have already added, you can double-click on the text. You will be prompted the same window as in step 2. Click “Delete text” button for permanently deleting the text from your photo.

Rotate Image

Use “rotate” icon to rotate your photo by 90 degrees each time.

Rotate

Crop Image

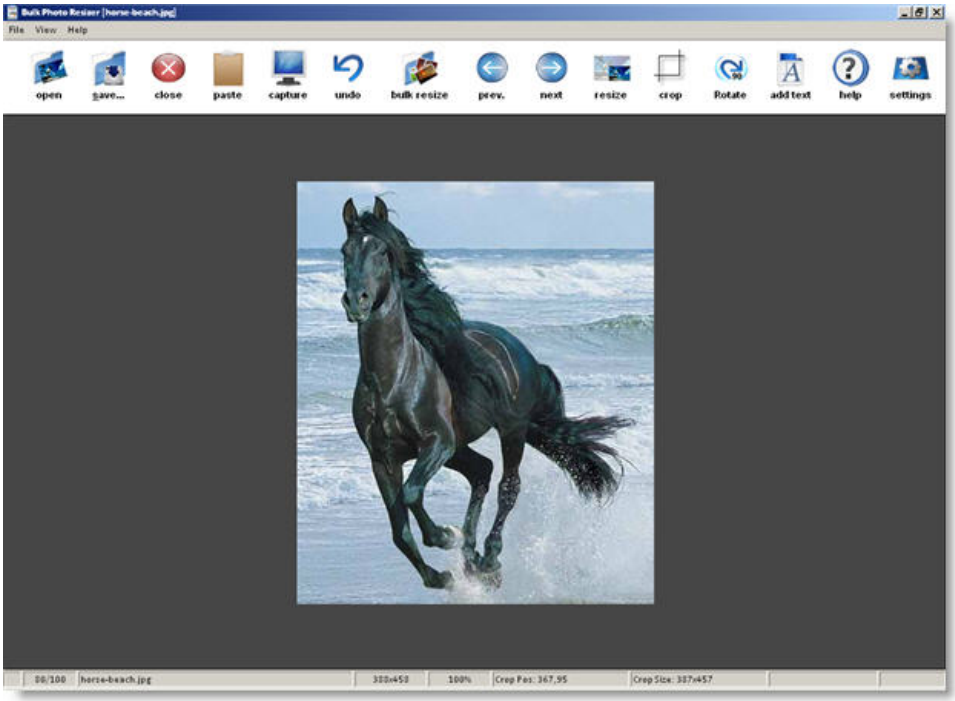
Use “crop” icon to crop your image. By using the crop option you can cut a selected portion of your photo. This functionality is performed when a specific area is to be separated and saved from a larger image.

crop

1. Open your photo in the main window of “Bulk Photo Resizer”.

2. Then click on “crop” icon and mark the selection you want to cut.
   Note: In the below photo, the horse is marked for cropping.

3. Then click on “crop” icon again to crop the selection.



4. Now you can save the cropped image.

Undo Changes

You can undo the changes you made to your photo by clicking on “undo”

icon.

Next / Previous Photo

You can you “prev.” and “next”

icons for navigating through the next and the previous photos of the folder.

Paste from Clipboard

If you have already copied a photo to your clipboard, you can use “paste”

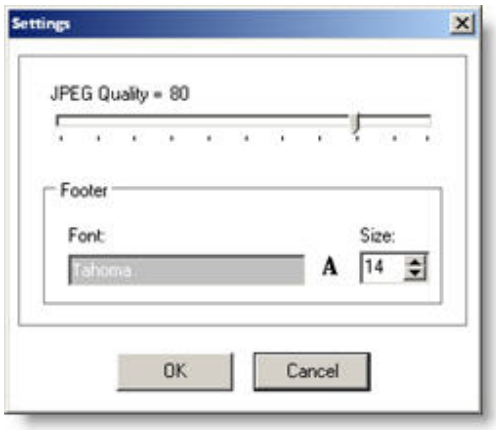
icon for pasting it to “Bulk Photo Resizer”.

Changing Photo Quality Settings

You can change the quality of the output photos by simply clicking “settings”

icon. Now you can slide the bar for changing quality of the output.

Also, you can change the footer font settings using the same window.



Uninstalling Bulk Photo Resizer

1. There are two ways of launching the uninstall program.
    a. Go to “Start” -> “All Programs” -> “Websites2ezy” -> “Uninstall Websites2ezy”.

    b. Go to “Start” -> “Control Panel” -> “Add or Remove Programs” and select “Websites2 ezy” and click “Change/Remove”.
